

Integration with

Position Manager

Integrating the Justifacts background screening process with the Position Manager ATS allows users in healthcare organizations to seamlessly request and manage background checks and other screening services that help bring in new talent faster!

We Help

Companies avoid hiring dishonest and unreliable employees.

ATS Integrations

Position Manager

Seamlessly request and manage background checks and other employment screening services from the easy-to-use Position Manager recruiting interface.

HealthcareSource®
Quality Talent. Quality Care.™

Turnaround Time

Speed is a critical component to the hiring process and Justifacts recognizes that employment screening reports need to be completed accurately and with a quick turnaround time.

Factors such as applicant information, system inefficiencies and the hassle of toggling between systems can create time gaps that contribute to longer turnaround times.

Highlights

- Reduces Turnaround Time
- Eliminates Duplicate Order Entry
- Seamless Integration Process
- Certified Integration Partner

The Solution

By utilizing a secure transmission of data between systems, clients can integrate Justifacts' screening reports into the Position Manager ATS.

Candidate data from Position Manager pre-populates into required fields necessary to perform an employment screening search eliminating the need for duplicate data entry which saves both time and money.

This Justifacts integration enables the Position Manager ATS to become the single source for candidate information and screening reports.
